

Open PhD Position in Transport Modeling & Simulation

December 15, 2011

The Division of Traffic and Logistics at KTH Royal Institute of Technology is hiring a PhD student in the field of transport modeling and simulation. KTH, located in Stockholm, Sweden, is one of Scandinavia's largest institutions of higher education in technology.

A suggested research topic is in on methodological aspects of transport microsimulations, with possible foci on calibration, optimization, and advanced statistical analysis. A strong methodological background (e.g., in mathematics, physics, control theory) is desirable.

The position is open until filled. Please include in your application a brief statement of your interests and capabilities in a relevant field, a curriculum vitae, and digital copies of possible publications. For further information and submission of your application, contact Gunnar Flötteröd via Email: gunnar.floetteroed@abe.kth.se. Interviews will be possible during TRB 2012 in Washington.
